Leadership Speak

At EPACK PREFAB, our story is built on the strength and dedication of our people. As we continue to grow and set new standards in the Pre-Engineered Building industry, it is clear that our team is the true force driving us forward. From our design and R&D centers spread across multiple locations in India to our manufacturing plants, corporate office in Noida, and sales offices nationwide, each part of our organization contributes to our shared success. Our diverse teams embody the passion, hard work, and innovative spirit that define EPACK PREFAB. Through their combined efforts, we've been able to deliver some of India's most challenging and significant projects in record time, establishing ourselves as the fastest-growing pre-engineered building company in the country. Every day, I witness the commitment and enthusiasm our team brings to their work, and I am filled with pride. I want to extend my deepest gratitude to each one of you. Your contributions have been invaluable, and I am excited about the future we will continue to build together.

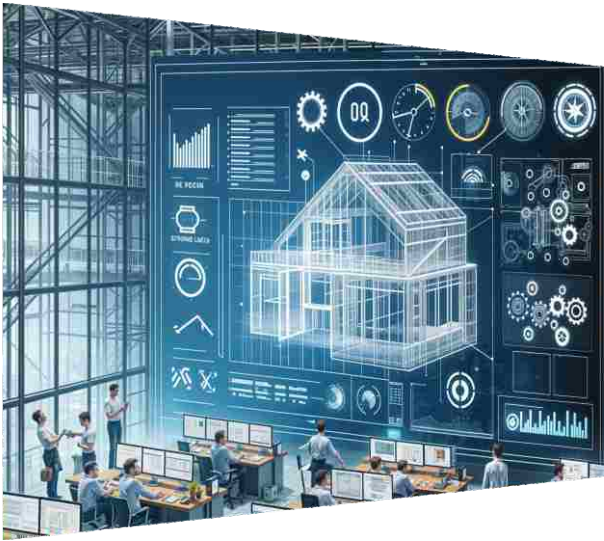

Mr. Nikhel Bothra (Director)

At EPACK PREFAB, design is at the core of our innovation, and I am proud to be part of this team that continually pushes the limits of what's possible in the Pre-Engineered Building industry. Our approach goes beyond meeting specifications; we focus on re-imagining how structures can be built faster, stronger, and smarter. In recent months, our design team has embraced advance automation to streamline and enhance STAAD Pro and AutoCAD, enabling us to deliver precise, efficient solutions. This shift has transformed the way we work, allowing us to handle complex projects with ease. However, it's our people that truly drive our success. Our talented designers tackle industry challenges with creativity and dedication, ensuring we stay ahead. Looking forward, I'm excited about the opportunities that lie ahead as we continue to raise standards and redefine design innovation in the industry. Together, we will keep delivering excellence at every step.

Mr. Yogesh Pakhale (Design Head)

Innovation at EPACK: Transforming Design With Automation

At EPACK PREFAB, innovation drives everything we do. This month, we're excited to highlight how our Design Team is reshaping the future of building design and engineering by embracing new automation tools in AutoCAD and STAAD Pro. Previously, generating a Bill of Quantities (BOQ) in AutoCAD required a tedious and error-prone manual entry process. Each detail had to be meticulously transferred into Excel, consuming valuable time and increasing the risk of inaccuracies. However, with our new automation capabilities, BOQs are now generated directly from AutoCAD in just minutes, and with a level of accuracy that manual entry simply couldn't match. This not only saves significant time but also allows our designers to focus on more strategic and creative tasks.

Our improvements in STAAD Pro are equally impressive. In the past, producing structural designs could take days of detailed calculations and drafting.

Now, thanks to smart automation, we can generate complete designs—including detailed diagrams and load calculations—in seconds.

This advancement has reduced design complexity, increased precision, and allowed us to handle a higher volume of design requests, improving productivity by as much as 20 times. These innovations have significantly boosted our efficiency and flexibility. We are now able to produce up to 20 designs daily, compared to just one under the old system. Additionally, when clients request changes, we no longer have to start from scratch; we can seamlessly modify designs from any point, saving time and reducing rework.

At EPACK PREFAB, we remain committed to leveraging technology to streamline our processes, reduce costs, and improve client service. These recent developments are a testament to our dedication to continuous improvement and our mission to set new standards in pre-engineered building solutions.

Net Zero हासिल करने के लिए प्रीफैब्रिकेटेड कंस्ट्रक्शन क्यों है जरूरी?

इन विधियों को लागू करने की कोशिश में कन्स्ट्रक्शन सेक्टर में कुछ महत्वपूर्ण बदलाव करना बहुत जरूरी है क्योंकि वे सेक्टर वर्ल्डवैड एमिशन का मुख्य स्रोत है।

Our Executive Director, Nikhel Bothra expressed his views on how EPACK Prefab and PEB technologies can help to achieve the goal of net zero emissions by 2070.

Built in India, building India: A path to Viksit Bharat by 2047

The construction sector has not only been supporting business growth but also facilitating ambitious infrastructure initiatives of the government, such as UPIAN and PM-Gati Shakti.

Our Executive Director, Nikhel Bothra shared his views on how EPACK Prefab and PEB technologies can play a vital role in achieving the goal of a Viksit Bharat by 2047.

Media Highlights

Our Managing Director, Sanjay Singhania interacted with Founder India TV and shared the inspiring journey of Epack Prefab from its inception to its great heights.

Our Executive Director, Nikhel Bothra wrote his views on how prefab construction will strengthen the network of sports facilities.

EPACK Event Highlights

78th Independence Day Celebration with Spirit and Unity

At EPACK PREFAB, the spirit of India's 78th Independence Day was alive across our locations, from the manufacturing plants in Greater Noida, Ghiloth, and Mumbatu, to our offices in Hyderabad, Chennai, Vizag, and beyond. It was a day filled with color, camaraderie, and a shared sense of purpose as we came together to celebrate both our national pride and our role in the country's growth story. Our Best Indian Traditional Dress competition was the highlight of the day, with employees from all corners of India proudly wearing their regional attire, creating a vibrant display of cultural heritage. Winners across different categories were recognized, adding an element of excitement and joy to the celebrations. But our Independence Day festivities were about more than just fun and prizes. They were an opportunity to strengthen team bonds and remind ourselves of the bigger picture: that each of us, in our daily work, is contributing to the nation's development. The day was infused with a genuine patriotic spirit, reflecting our commitment to not just achieving business success but also to making a meaningful impact on our country's progress.

EPACK Event Highlights

Engaging with GMR: A Creative Approach to Collaboration

New Delhi, August 9, 2024 — At EPACK PREFAB, we believe that building strong relationships is as important as building structures. In line with this philosophy, we recently organized a vibrant client engagement event at the GMR Office in New Delhi under our "EPACK Connect" initiative. The event was designed to be a unique blend of creativity and innovation, setting the stage for meaningful conversations and new opportunities. We brought along a talented caricature artist who captured the lively essence of GMR employees and management in fun and memorable sketches. This creative touch set a positive tone, allowing us to introduce our innovative Pre-Engineered Building (PEB) solutions in a relaxed and engaging atmosphere. This engagement was a significant step in strengthening our relationship with GMR, and we are excited about the potential collaborations that lie ahead.

At EPACK PREFAB, we are committed to creating value for our clients through innovative approaches and strong partnerships.

EPACK Event Highlights

Rakshabandhan Celebration: Festive Joy at Project Sites

At EPACK PREFAB, we know that our project teams often sacrifice personal celebrations to keep our commitments on track. Away from their families, they work through festivals, day and night, with unwavering dedication. This Rakshabandhan, we wanted to bring a bit of home to them, right where they work.

To make this festival special, some of our female team members traveled to various project sites, carrying the spirit of Rakshabandhan with them. They tied rakhis on their colleagues, shared sweets, and brought a sense of celebration and joy directly to our teams. The site, often filled with the sounds of construction, came alive with laughter and warmth, creating a festive atmosphere that was both heartfelt and genuine.

This simple gesture was a way to show appreciation for our project teams who work tirelessly and often miss their own celebrations. The moments shared on-site reminded everyone of the strong bonds we have as a family at EPACK PREFAB.

Projects Completed

Asahi India Glass Limited (Factory Building)

Area
3.89 Lakh Sqft

Location
Chittorgarh, (Raj)

Avanthi Warehouse (Warehouse Building)

Area
4.48 Lakh Sqft

Location
Vizag, (A.P)

Ongoing Project

Majestic Auto Ltd. (Warehouse Building)

NDR Space Pvt. Ltd. (Warehouse Building)

Ram Ratna Wires Limited (Factory Building)

Ratnamani metal & tubes ltd (Factory Building)

Big Project Won

BELUR ENGINEERING
PRIVATE LIMITED

In His Own Words

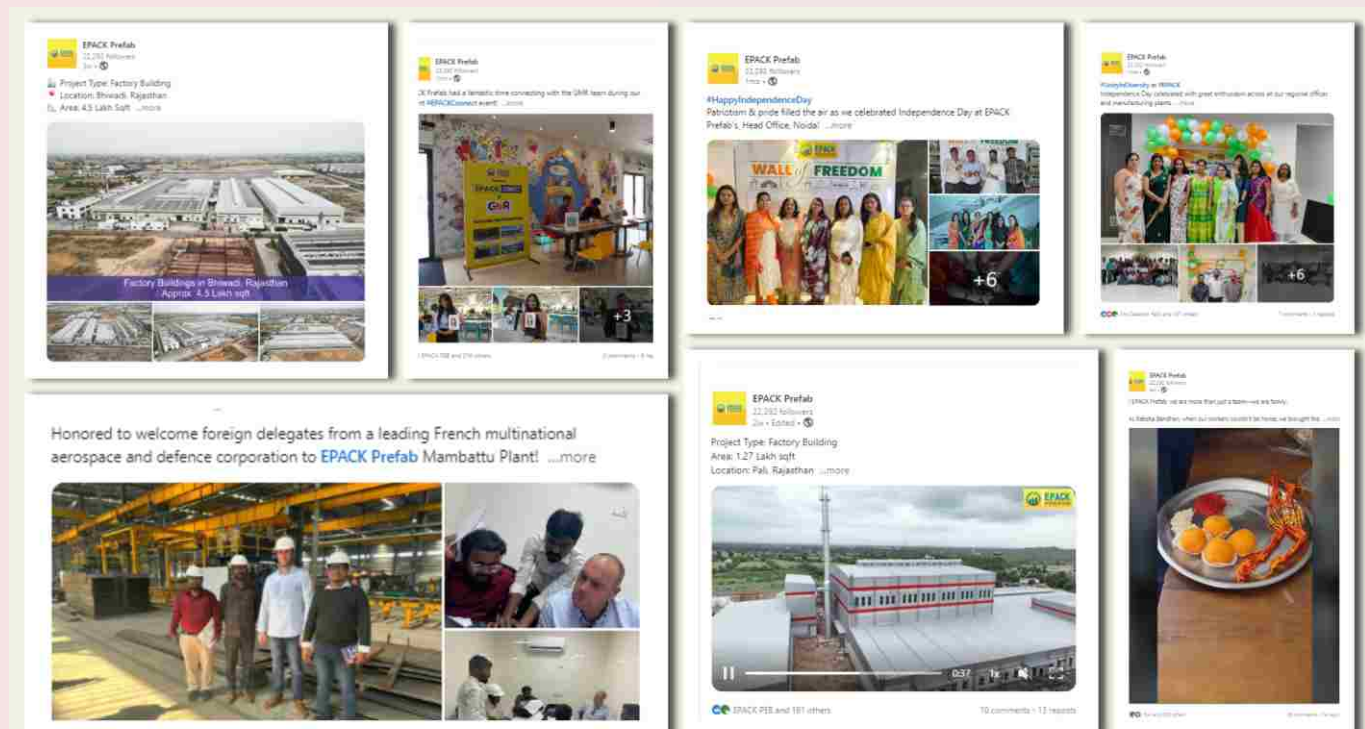

I know EPACK PREFAB for the last three years, and I've seen them quickly become a big player in Pre Engineered Building (PEB) projects. Their growth in such a short time is quite impressive.

V. SRIDHAR REDDY

Managing Director, Sri Harsha Consulting Engineers
